AWARNESS OF NATURAL CALAMITY

কী করবেন

- সুরক্ষিত উঁচু জায়গায় আশ্রয় নিন।
- ব্যাটারীচালিত রেডিও ব্যবহার করুন।
- দুর্যোগবর্তা অন্তরে অন্তরো খাবার, জল, জ্বালানীর আয়োজন করে নিরাপদ জায়গায় সরিয়ে রাখুন।
- ওষুধপত্র, জল পরিশোধনকারী ট্যাবলেট, টর্চ, দেশলাই, হ্যান্ডিকেন মূল্যবান কাগজপত্র প্লাস্টিকে মুড়ে হাতের কাছে রাখুন।

কী করবেন না

- বাসি খাবার খাবেন না।
- কুয়ো বা পুকুরের জল না ফুটিয়ে খাবেন না।
- গুজবে কান দেবেন না ও গুজব ছড়াবেন না।
- কোনো ধরনের বৈদ্যুতিক যন্ত্রপাতি ব্যবহার করবেন না।
- জানালা দরজা খোলা রাখবেন না।

ঘূর্ণিঝড়

কী করবেন

- শিশু মহিলা ও অসুস্থ মানুষদের নিরাপদ স্থানে সরিয়ে নিয়ে যান।
- নিয়মিত রেডিওর খবর শুনুন।
- জানালা ও দরজা বন্ধ করে রাখুন।
- প্রয়োজনে আশ্রয়কেন্দ্র বা নিকটবর্তী পাকা বাড়িতে আশ্রয় নিন।
- সাইক্লোনের পরবর্তী সময় বর্জ পদার্থ নির্দিষ্ট জায়গায় ফেলুন।

কী করবেন না

- অকারণে আতঙ্কগ্রস্ত হবেন না বা গুজব ছড়াবেন না।
- উপকূল অঞ্চলে ঝুঁকিপূর্ণ এলাকায় বাড়ি নির্মান করবেন না।
- গাছ কাটা বা জঙ্গল ধ্বংস করবেন না। কারণ গাছের সারি ঝড়ের আঘাত কমিয়ে দেয়।
- গবাদি পশুর মৃতদেহ যেখানে সেখানে নিক্ষেপ করবেন না।
- ঘূর্ণিঝড়ের সময় গাছের নীচে দাড়াবেন না।

ভূমিকম্প

কী করবেন

- ভূমিকম্পের আভাস পাওয়া মাত্রই ঘর থেকে বেরিয়ে আসুন।
- ঘর থেকে বেরোনোর সময় না পেলে ঘরের কোনায় কোনো মজবুত পিলারের কাছে দাঁড়ান।
- খোলা মাঠে বা ফাঁকা জায়গায় গিয়ে দাঁড়াবেন।
- টিভি, ফ্রিজ, গ্যাস বদ্ধ করে রাখুন। কেবলমাত্র ব্যাটারীচালিত রেডিও ব্যবহার করুন।
- বাড়ি করার সময় ভূ-কম্প রোধক প্রযুক্তি ব্যবহার করুন।

কী করবেন না

- কাঁচের দরজা, জানালা, আলমারী থেকে দূরে থাকুন।
- বাড়ি থেকে বেড়িয়ে এসে কোনো উচু ভাঙা বাড়ি বা ইলেকট্রিক পোলের সামনে দাঁড়াবেন না।
- ভূমিকম্প চলাকালীন চলন্ত গাড়িতে থাকবেন না।
- ভূমিকম্পের সময়ে সিঁড়িতে বা স্কালারান্দায় থাকবেন না।
- ভাঙা জিনিষপত্র বাইরে খালি জায়গায় ছুঁড়ে ফেলবেন না।

Departmental plan

HEALTH DEPARTMENT

The disaster is defined by WHO as “any occurrence that causes damages, ecological disruption, loss of human life and deterioration of health and health services on a scale sufficient warrant an extraordinary response from outside the affected community or area.” Among the natural disaster floods accounts for the largest number of events in the world as well as in India followed by cyclone. In Nadia district of West Bengal flood is most commonly occurring natural calamities mostly due to its climatic & geophysical characteristics.

Experiences of disaster in Nadia district:

Like many other districts flood is an annual phenomenon in Nadia district followed by cyclone. The district is intersected by number of rivers like River Ganga, Jalangi&Churni. All rivers are coming from north & going towards south so rainfall in northern region or hilly areas causes over topping of river. So, disaster partially depends on the rain fall & other environmental condition. At the same time water holding capacity of rivers & water channels are decreasing day by day due to silting of river beds. Flood in Nadia district is mainly due to overtopping of river due to heavy rainfall or sudden discharge of huge amount of water from Tilpara barrage or Mython dam.

Flood in Nadia usually occurred during late monsoon while cyclone form in the Bay of Bengal between May to November as such it coincides with monsoon. Experiences in recent past shows

that a devastating flood occurred in the month of August' 2015. The flood causes huge loss of crops, houses & cattle's leads to immeasurable human sufferings. In 2015 flood, 16 blocks of the district and 3 municipalities was affected. Badly affected blocks were Nabadwip, Santipur.

Considering the flow of the river & geographical location of blocks – 16 blocks & 59 GPs and 3 Municipal wards found to be flood prone in the district. Conservative estimation shows at least **128073** people living in highly flood prone area. But from the experiences of year 2000- all blocks may be considered flood prone. Also, to mention that there are pockets where flash flood & water logging occurred almost in every year. Diarrhoea was the most common health hazards following flood – due to contamination of drinking water sources & non-availability of safe water to maintain personal hygiene. Others health hazards were ARI, skin ailments, Snake bites etc.

Thus, along with medical treatment of ailments – sanitation of relief camp, disinfection of drinking water sources considered to be another important activity of PHE dept. as well as health dept.

In the year 2016 and 2017 no such disaster occurred in the district Nadia.

So, pre-disaster precautionary measures & preparedness against these two types of natural disaster are taken up in a planned manner at all levels (District, Block & G.P) before the monsoon every year. The concept & interest of disaster rescue & relief has changed to disaster preparedness & response activities. So far preparedness status of any district or area against a specific type of event is prime importance to prevent grave consequence of the event or calamity.

Health Sector Disaster Preparedness:

❖ Pre-Disaster period:

Health sectors importance is clearly seen after the sudden impact of natural disaster. It is essential that health facilities & services continue to function after a disaster strike. As it is a multi-sectorial & multidisciplinary in approach so it is important that health facilities equipped in co-ordination with other relevant sectors like food & supplies, PHE, PWD, Agriculture etc. Thus, to minimize the health hazards district health official work closely with allied sectors & municipal workers to set up a response system which reduces risk of water contamination, water & insect borne diseases, safe disposal of solid wastes as a part of a routine preparedness planning.

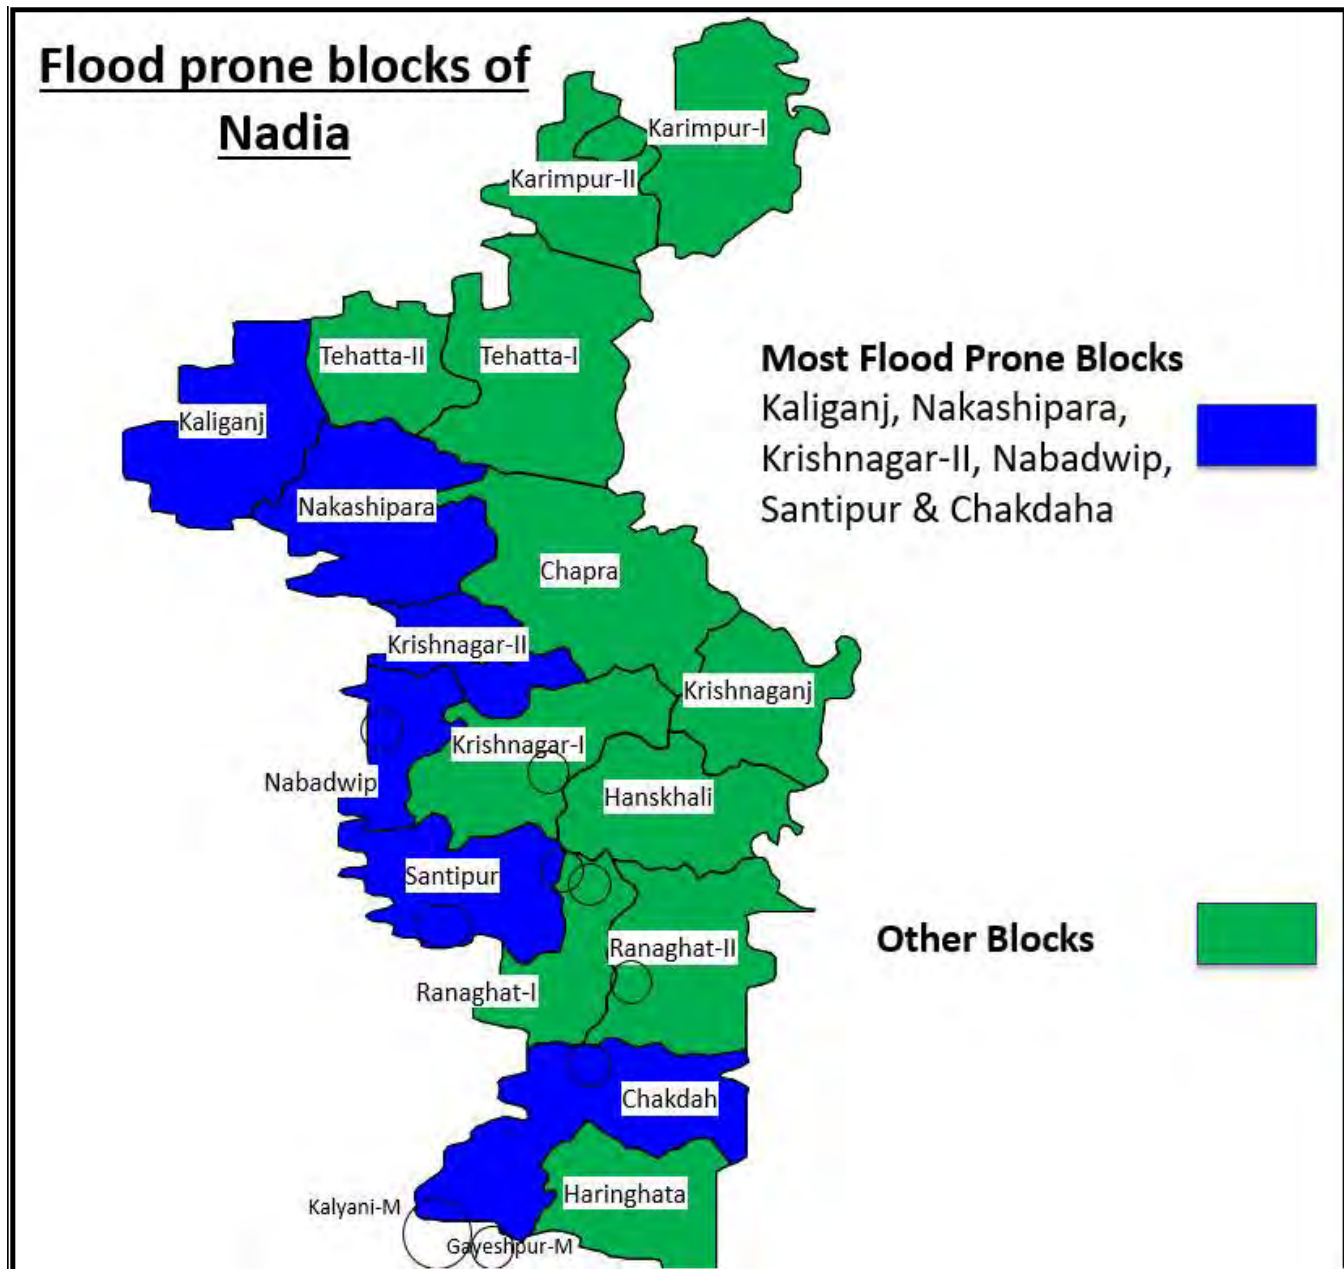

During pre-flood season following steps were followed to complete a flood contingency plan.

- Hazard mapping- identification of disaster & specific disaster-prone areas.
- Vulnerability analysis & Health Risk assessment.
- Crisis management committee& medical relief team (district, Subdivision, Block& G.P level)
- Mass causality management plan.
- Preparation of list of staffs, vehicles for emergency management of crisis.
- Storage of drugs & disinfectants at block & GP level.
- Ensuring early warning.
- Identification of flood shelter- ensures safe drinking water & sanitation facility & disinfection of drinking water sources in flood shelters.
- Co-ordination& transfer of information between allied sectors.
- Development of communication channel & reporting- during disaster & post disaster period.
- Continued disease surveillance during post disaster period.

➤**Hazard Mapping-**

Highly flood prone areas are Nabadwip&Santipur block as well as both municipalities. It has been found that people with poor living condition i.e marginal population are living in flood prone areas & they are the worst suffers.

Flood prone blocks of Nadia

FLOOD 2015-2017

YEAR	Type of disaster	No of block affected	No of GP/M. ward affected	Total population affected	Total No of death.
2015	Flood	16	59	128073	23
2016	NA	0	0	0	0
2017	NA	0	0	0	0

➤ **Vulnerability analysis & Health risk assessment -**

It is being increasingly realised that ‘probable risk’ must be taken into account to deal with any disaster. Poor communities in peri-urban areas of Santipur&Nabadwip Municipalities or marginal people of Nabadwip, Santipur, Kaliganj&Nakasipara blocks are vulnerable to disease due to marginal condition in which they live. Thus, the community also needs to be sensitized through PRI or NGO on relative risk. At the same time experiences of the district shows that there is a ‘acceptablerisk’ by the community after a careful consideration of potential losses & benefits in these areas. Records available for flood as on 18/08/2015 are as follows-

Sl.No	Blocks/ Municipality	Diarrhoea		Fever		ARI		Snake Bite		Drowning		Accidents

Data shows that the disease already prevalent in these areas flare up following flood or cyclone. No new disease has so far found which was uncommon in the area.

➤Crisis management committee & Medical relief team-

In the district, as per state guide line there is a crisis management committee headed by District Magistrate & another allied department are member. Similarly, crisis management committee formed at SD & Block level. DRO, SDRO& BRO from dept. of Relief take a leading role respectively at district, Sub division & block level.

In the health sector disaster preparedness, organizational structure as follows-

➤Mass casualty management plan-

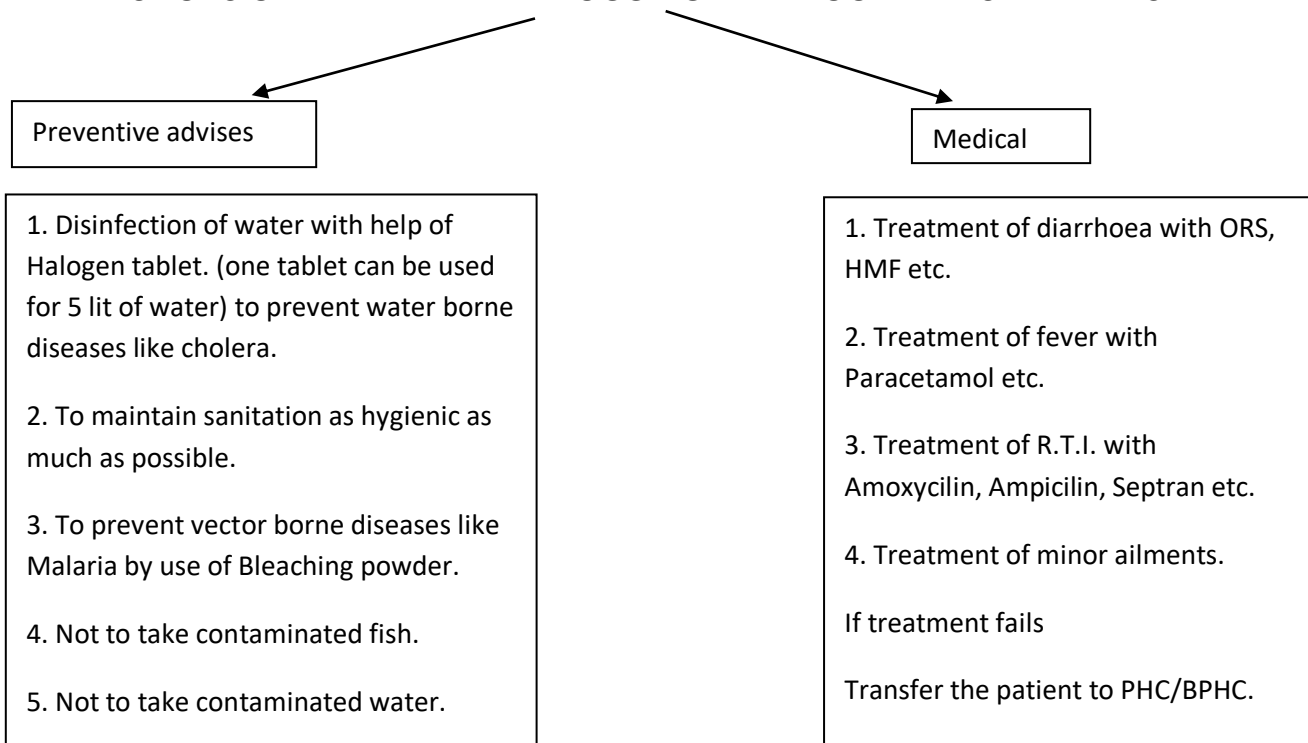

Considering the experiences of last devastating flood disaster in 2000, Ranaghat SDH, Bethuadahari RH & Nadia District Hospital, Saktinagar has been identified for mass casualty management. It was decided that up to 10% bed strength may be increased in all identified hospitals if mass casualty occurred. Accordingly, bed, Linen etc to be provided well in advance & some staffs to be deployed. All BMOHs, ACMOHs & Superintendent of hospitals were informed regarding the details of arrangement of Mass Casualty Management Plan. In mass casualty preferably affected people from Santipur, Ranaghat-II, Hanskhali&Chakdaha to be send to Randghat SDHospital, Kaliganj, Tehatta-II to Nakashipara BPHC & patients from remaining blocks will be send to District Hospital, Nadia.

PLAN FOR RESQUE

PLAN: Information sent from affected village to block And Action taken from Block to Flood effected Area.

ACTIONS OF TEAM IN WATER LOGGING AND FLOOD AFFECTED AREAS

➤ **Decentralised storage of drugs & disinfectants-**

Based on experiences of diseases burden following flood disaster following drugs & disinfectants were identified as essential for the disaster

District: Nadia

- Experiences in last 10 years shows that like West Bengal, Flood is almost an annual phenomenon followed by cyclone in Nadia district.

There was a devastating flood in the 2000 causing flood in all 17 blocks & municipalities of the district.

6(Kaliganj, Nakashipara, Krishnagar-II, Nabadwip, Santipur & Chakdah) out of total 17 blocks & 2(Nabadwip & Santipur) out of 10 municipal areas found to be flood prone.

Among flood prone areas Nabadwip & Santipur block as well as both municipality found to be highly Flood prone.

People living in 105 GP out of total 187 GP identified as flood prone & 471 rescue camp has been identified in these areas.

Record shows that diarrhoea is the commonest health hazards following flood disaster.

During pre-disaster period –preparedness meeting plan to be held in the district as well as Subdivision & block level. Like district block Disaster Contingency plan- similar plan also to be prepared in flood prone blocks)

Identified flood medicine to be sent to blocks with instruction to send specified drugs & disinfectants to flood prone GP office.

For mass causality management 3 hospitals being identified- District Hospital, Ranaghat SDH & Bethuadahari RH.

Arrangement for additional cot, linen etc will be planned.

List of vehicles for transportation of patients in mass causality.

One day workshop on disaster management for doctors & other health staff both at district & block level proposed.

- Both at Block, Sub Division & District level RRT – to be revised within May 12.

Control room during flood planned at CMOH officer.

List of Contact No & e mail Id of all concern prepared.

Inter-sectoral co-ordination meeting to be held at different level.

Outline of budget prepared.

Drugs & disinfectants

- Medicine & disinfectants in a camp with 30,000 population for 30 days Diarrhoea attack rate 10%-12%, ARI 6% - 8%

So about 300 episodes of diarrhoea & 200 episodes of ARI.

ORS- $300 \times 3 = 900$ pkts, Referral 15-may need IV fluid

Metronidazole for 10% episode i.e. 30×15 tab = 450 tablet

Norfloxacin for 2% episode i.e. $6 \times 10 = 60$

Antispasmodic & anti-emetic for 10% episode @ $5 \text{ tab} \times 30 = 150$ each

Cotrimoxazole for 10% i.e. for 20 persons (approx. 12 child, 8 adult) so, 240 kid & 80 DS.

- Paracetamol @ $6 \times 20 = 160$

Bleaching powder- for camp disinfection 1 pkt of 25kg

water requirement for drinking $2.5 \text{ lit} \times 30 \text{ days} \times 30000 = 225000 \text{ lit} / 20 = 11000$

- Halogen tablet required -11000(approx).

IV fluid & AVS may be kept at PHC (1V fluid for 3-5pt. & AVS for 1-2 pts.)

LOGISTIC REQUIREMENT

➤ **Ensure early warning by general administration-**

❖ **During disaster: -**

When disaster strikes medical relief as well transfer of information about the current status including disease surveillance to the HQ as well as allied sectors is essential. Alternate channel of communication may be required to ensure daily up to date information.

❖ **Post disaster period: -**

➤ **Disease surveillance-**

As it has been proved that the diseases common in the area are only flare up following any disaster. Thus, surveillance of communicable disease during disaster & post disaster is important to have an idea about the type & burden of the disease for further planning. There is a uniform format provided by the state to have data daily during disaster & post disaster period. This surveillance continued at least 6-8 weeks following disaster.

➤ **Disinfection of water sources-**

Poor hygiene is the major cause of food-borne disease in disaster situation. Kitchen sanitation is of utmost importance. A survey of all public water supplies should be made. The first priority of ensuring water quality is microbial containment.

AGRICULTURE DEPARTMENT.

It is our experience that hot and dry weather condition generally starts in this District from Mid. March and continues up to May with the temperature varying between 35.0° & 41.5 ° Celsius. Average normal rainfall of this district is **1282.15** m.m. Monsoon generally commences in this District from Mid. June & stays up to Mid. October.

Drought/Flood generally hits this district more or less every alternate year. Existing different irrigation facilities are exploited to irrigate the land under cultivation by about 88% though the irrigation potential is very high. Yet, when drought or dry spell comes the standing crops have to face much moisture stress due to texture & structure of the soil. More or less all the Blocks have drought & flood prone area. The total drought & flood prone area of this district is 51610 & 71950 ha respectively. The plan of action for managing and mitigating natural calamities, be it drought or flood, is given below in details.

Planning may be adopted for the mitigation of vulnerability due to DROUGHT:

SI No	Condition	Suggested Measures
	Early season drought	A) Direct seeding by drumseeder
		B) Paddy sowing by Zero Tillage Machine
		C) Adopt SRI method of cultivation
		D) Transplant 3-4 seedlings/hill
		E) Crop Insurance
		F) Distribution of seeds of drought tolerant, short duration varieties like Sahabhagi
		G) Adoption of SARP method of paddy cultivation.
		H) Preparation of Short duration seeds of HYV paddy Variety in Govt Farms in phases with a view to provide paddy seedlings to the affected farmers on no loss no profit basis.
	Mid Season Drought	A) Rain Water Harvesting Structures & Watershed development Projects should be developed. Maximum use of available water with the help of pumpsets and waterlift and Jal Dharo Jal Bharo Programme.
		B) Distribution and installation of modern, high water use efficient irrigation system like drip, sprinkler, raingun etc.
		C) Rational use of irrigation water.
		D) Field should be kept weed free. No top dressing of nitrogenous fertilizer.
		E) Crop insurance
	Late Season Drought	A) Rain Water Harvesting Structures & Watershed development Projects should be developed. Maximum use of available water with the help of pumpsets and waterlift.
		B) Life saving irrigation with the help of Pumpsets and water lift.
		C) Planning for early Rabi crops like Oilseed, pulses vegetables and distribution of seedkits as minikit to affected farmers.
		D) Crop Insurance
		E) Planning for sowing of alternate crop.

Planning may be adopted for the mitigation of vulnerability due to Flood:

SI No	Condition	Suggested Measures
	Early season Flood	A) Drainage system should be developed properly.
		B) Retransplanting of Paddy/Direct Seeding of paddy by Drumseeder
		C) Cultivation of flood resistant varieties like Swarna Sub-1
		D) Preparation of Short duration seeds of HYV paddy Variety in Govt Farms in phases with a view to provide paddy seedlings to the affected farmers on no loss no profit basis.
		E) Crop Insurance.
		F) Establishment of Community Nursery
		G) Gap filling of damaged hill.
		H) Preparation of Short duration seeds of HYV paddy Variety in Govt Farms in phases with a view to provide paddy seedlings to the affected farmers on no loss no profit basis.
SI No	Condition	Suggested Measures

	Mid Season Flood	A) Drainage of excess water
		B) Cultivation of flood resistant varieties
		C) Retransplanting of Paddy/Direct Seeding of paddy by Drumseeder with short duration varieties where feasible.
		D) Distribution of seeds of extra short duration paddy varieties.
		E) Crop insurance
		F) Kalai Seed Minikit may be distributed among affected farmers.
	Late Season Flood	A) In case of late flood from Mid. September to Mid October & when there will no scope of retransplanting paddy due to water logging or submerged condition of land, the affected farmers may be advised to go for Rabi cropping programme by exploiting residual moisture of the land.
		B) Planning for early Rabi crops like Oilseed, pulses vegetables and distribution of seedkits as minikit to affected farmers.
		C) Crop Insurance
		D) Distribution of seedkit of oilseeds and pulses as minikit to farmers.

To overcome adverse effect of Flood

Actions to be taken up by farmers:

1. Staggered sowing of paddy seed bed at 10 days interval for atleast 2500 ha.
2. Higher place of elevation to be chosen for raised seed bed.
3. Cultivation of Flood Tolerant Variety like Swarna Sub-1 to be followed.
4. To reduce the detrimental effect of sand deposition in cultivated land, sufficient organic matter to be applied.
5. Use of drum seeder for late sowing.
6. Use of zero tillage technology for better result in adverse condition.
7. Double transplanting of paddy will be very helpful specially after receding flood water during early and mid season flood.
8. In case of late transplanting 5-6 nos of seedling per hill to be transplanted and basal dose of Nitrogen to be increased.
9. Where there is no time for rice cultivation:
 - a. Kalai may be grown in post kharif season.
 - b. Toria, yellow sarson, lentil, gram, pea, vegetable may be grown early in the Rabi Season.

Measures to be taken up by the Agricultural Department:

- a. Staggered seed bed at Govt Farm- 1 Acre each in Govt Farm.
- b. Requirement of seed and fertilizer kit to be submitted to higher authority to meet up the contingent need.

To Overcome Adverse effect of drought

Actions to be taken up by farmers:
